Note from the Chairman

As Perpetua Resources prepares to enter the construction phase of the Stibnite Gold Project, it's timely for us to launch our inaugural newsletter. This regular publication will keep our communities informed about important project developments and highlight the ongoing efforts of the Stibnite Advisory Council.

The council's job is to represent and advocate for the people and businesses in our local communities impacted by the Stibnite mine project.

Tom Reinhardt

Chairman, Stibnite Advisory Council

What is the Stibnite Advisory Council (SAC)

Collaboration, Transparency, and Respect

The Stibnite Gold Project will bring change to all of our communities. We believe solutions and opportunities need to be identified and developed on a regional basis. By working together, we can have a stronger voice and create a larger positive impact.

Representatives in each community are available to answer your questions and engage in open dialogue regarding the project.

Discussion Topics

Since the beginning of 2025, SAC has received technical presentations from Perpetua Resources on the following topics:

- Final Record of Decision and Path Forward
- Air Permit Updates
- Infrastructure, Powerline, and Substations
- Intersection Improvements on Highway 55 and New Sections of Burnt Log Road
- Security Now and Into the Future

Ongoing Work:

- Independent Water Monitoring Program
- Workforce Survey
- Economic Impact Study
- Building our Frequently Asked Questions

What's Next

- Permitting Updates
- Construction Updates
- Litigation Updates
- See Something / Say Something Formal Grievance Mechanism

CONSTRUCTION UPDATE

Perpetua Resources received its Final Record of Decision in January 2025. They are now working on finalizing advanced engineering and obtaining the last few federal, state and county permits required to start construction this summer.

If you are interested in contracting for the Stibnite Gold Project, visit www.PerpetuaResources.com and complete the Vendor Intake form.

Infrastructure plans currently being finalized will include powerline and substation improvements, intersection improvements on Highway 55, and final design work for the new sections of Burnt Log Road.
